<<生理学>>

内容概要

美国医师执照考试(United States Medical Licensing Examination, USMLE)是针对全世界各国医学院的学生或毕业生,欲到美国从医的执照考试,考试全部为选择题,采用计算机考试。

考试分为:Step 1(第一阶段)、Step 2(第二阶段)、Step 3(第三阶段)。

本册为Pre Test列之《生理学(第13版)》。

当前,我国很多医学院校在进行英文授课、考试的改革,本书对国内从事英语授课、考试的教师和学生也有重要的参考价值。

为广大的医学生和医务工作者比较中美医学教育和自己掌握的知识提供参考。

同时,该书也是学习专业英语的好教材。

章节摘录

插图：150. The answer is b. (Ganong , PP 297-298. Stead , PP 298-299) Strenuous exercise and a high protein diet can cause overproduction of uric acid. Allopurinol , which inhibits xanthine oxidase , decreases the primary cause of gout by decreasing uric acid production. Colchicine is given in acute gout to inhibit phagocytosis of uric acid crystals by leukocytes , a process that in some way produces the joint symptoms. Nonsteroidal anti-inflammatory drugs , particularly indomethacin , are also used to relieve the acute arthritic symptoms of gout. Aspirin is contraindicated in acute gout because it decreases urate excretion. Uricosurics are effective in increasing the excretion of uric acid in patients whose gout is caused by decreased urate excretion , such as chronic renal disease , diabetes ketoacidosis , use of thiazide diuretics , and ethanol ingestion.

媒体关注与评论

"I like the High-Yield section in the beginning of the book. It's a nice quick review yet at the same time is thorough and includes the truly high-yield things to know for boards and class." ——Sheree Perron , Third Year Medical Student , Eastern Virginia Medical School
"I found PreTest Physiology to follow fairly closely my experience with the USMLE Step 1 as far as question structure and depth of the material covered. The most basic and most commonly tested questions in physiology in each system were addressed as well as some of the finer details students still need to know" ——Daniel Marcovici. Third Year Medical Student, Sackler School of Medicine, Tel Aviv University
