## <<先进材料物性和应用>>

### 内容概要

作为第六届先进材料物性和应用国际学术研讨会的会议论文集，本书内容主要包括以下六个方面的最新研究进展：1)先进材料的制备和表征；2)先进功能材料的结构和物性；3)纳米结构材料物理与化学；4)自旋电子学、氧化物电子学与信息材料；5)超导材料的物理特性和应用；6)计算机辅助材料设计。

## 书籍目录

## Part I Processing and Characterization for Advanced Materials

CeO<sub>2</sub> Thin Films Grown on Glass Substrate from Aqueous Solution and

Their Optical Property

Chihaya Kawai, Takashi Hashizume, Atushi Saiki, Kiyoshi Terayama

Preparation of the CeO<sub>2</sub>-TiO<sub>2</sub> Compositied Thin Film Using the Aqueous

Solution Containing the TiO<sub>2</sub> Powder

Takahiro Miura, Takashi Hashizume, Atsushi Saiki, Kiyoshi Terayama

Age-Hardening Behavior of AM60 and AZ61 Magnesium Alloys

Yuhei Ebata, Mitsuaki Furui, Susumu Ikeno, Kiyoshi Terayama, Seiji Saikawa, Katsuya Sakakibara

Electrochemical Characteristics of Mg-9mass%Al Alloy Immersed in Na<sub>2</sub>SO<sub>4</sub> Solution

Mihoko Hori, Mitsuaki Furui, Satoshi Sunada, Susumu Ikeno, Kiyoshi Terayama, Seiji Saikawa

Effect of Demolding Temperature on Aging

Behavior in Al-10mass%Si-Xmass%Mg

Alloy Cast into Sand Mold

Youhei Kano, Mitsuaki Furui, Susumu Ikeno, Kiyoshi Terayama, Seiji Saikawa,

Tomoyasu Yamaguchi

Effect of Magnesium Content on Age Hardening in Al-10%Si-X%Mg Casting Alloy

Tomoyuki Kitamura, Tokimasa Kawabata, Mitsuaki Furui, Kenji Matsuda,

Susumu Ikeno, Kiyoshi Terayama, Seiji Saikawa

Stress Corrosion Cracking Evaluation Using Slow Strain Rate Tensile Test

in 60/40 Brass Worked by Torsion and

Back-Torsion Process

Natsumi Kusa, Masahiro Shinsen, Mitsuaki Furui, Susumu Ikeno, Satoshi Sunada,

Atsuahi Saiki, Kiyoshi Terayama

Effect of Aluminum Content on Age-Hardening Behavior in AZ System

Magnesium Alloys Cast into Permanent Mold

Kazuki Minami, Mitsuaki Furui, Susumu Ikeno,

Kiyoshi Terayama, Seiji Saikawa, Katsuya Sakakibara

Effect of Pre-Aging on Two-Step Aging in

<<先进材料物性和应用>>

Al-10mass%Si-0.3mass%Mg Alloy

Cast into Permanent Mold

Ryuichi Morioka, Mitsuaki Furui, Susumu Ikeno,  
Kiyoshi Terayama, Seiji Saikawa

.....

PartII Structure and Properties of Advanced Functional  
Materials

PartIII Physics and Chemistry of Nanostructure Materials

PartIV Spintronics Oxide Electronics and Information  
Materials

PartV Physical Properties and Application of Superconductors

PartVI Computer Aided Materials Science

章节摘录

版权页：插图：Abstract：AZ system magnesium alloys which were cast into gravity casting and included 3 , 6 , 9 and 12mass%aluminum wereinvestigated the changes in hardness and the microstructure evolution using Vickers hardness tester and optical microscopy.Specimens were solution treated at 688 or 708K for 86.4 or 259.2ks.Affer that , aging treatment was performed by threetemperatures of 423 , 473 and 523K.Specimens indicated age hardening obviously in all aging temperatures.In each AZ systemalloys.the peak hardness tended to increase by decreasing the aging temperature and increasing the aluminum content and the timeto reach the peak hardness was shogened with increasing the aging temperature.The volume fraction of discontinuous precipitationwhich increases with the passage of aging time was also increased by increasing the aluminum content.
