章节摘录

版权页：插图：Unnecessary Supplementary Classes
The picture shows us that a teacher is [1] publicizing his supplementary class to his students. And he preaches that those who attend his supplementary class can enhance their school performance immediately. Obviously, the purpose of the picture is criticizing that all kinds of [2] supplementary classes seem to become an indispensable extension of normal schools. As for the above prevalent phenomenon, some people [3] are in favor of it. They believe that [4] only by attending such supplementary classes can their children obtain more knowledge than others. But, I don't [5] see eye to eye with them and I insist that supplementary classes do [6] more harm than good. To start with, as attending supplementary schools [7] calls for additional money, it will [8] add to the financial hardships of many families. In addition, attending supplementary classes is burdensome and thus [9] goes ill with the healthy development of the students. Thirdly, supplementary schools may encourage some unethical teachers to cut their normal lectures so as to make profits by running supplementary classes.
