## <<Architecture Industr>>

### 内容概要

Complessi industriali dismessi, che hanno quindi perso la propria funzione originaria, possono rinascere a nuova vita grazie a progetti di riconversione che, rispondendo alle esigenze di una società moderna in continua trasformazione, consentono un nuovo utilizzo di tali strutture. Industrial Chic riflette questa costante metamorfosi del paesaggio urbano: una metamorfosi che interessa ormai numerose metropoli e città in tutto il mondo. En perdant leur fonction principale, les bâtiments industriels se voient modifiés et reconvertis des fins multiples et s'adaptent aux nécessités du présent. Industrial Chic reflète cette métamorphose constante du paysage urbain de diverses villes du monde entier. Industrial buildings in disuse, which have lost their main function, can be given a new lease of life by great projects which allow their reconversion into new and multifunctional solutions living up to the present-day needs. IndustrialChic reflects this constant and modern transformation of urban landscape in several cities around the world. Al perder su cometido principal, las edificaciones industriales son modificadas y reconvertidas para que adquieran múltiples funciones y se adapten a las necesidades del presente. Industrial Chic refleja esta constante metamorfosis del paisaje urbano de diversas ciudades de todo el mundo. Com o decorrer do tempo, muitos edifícios industriais antigos perderam as suas funções originais e foram reconvertidos em espaços modernos de múltiplas funções, adaptados às exigências dos nossos dias. Industrial Chic reflecte as transformações na paisagem urbana de várias cidades em todo o mundo.
