

<<分子电子学>>

图书基本信息

书名：<<分子电子学>>

13位ISBN编号：9789812382696

10位ISBN编号：9812382690

出版时间：2003-12

出版时间：Aspen Publishers

作者：James.M.Tour 著

页数：370

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<分子电子学>>

### 内容概要

This book presents an in-depth discussion on molecular electronics in an easy-to-understand manner, aiming at chemists, computer scientists, surface scientists, physicists, and applied mathematicians. Lighter overviews are provided for the science-minded layperson and the high tech entrepreneur in this nanoscale science. The author has included a detailed synthetic chemistry treasure chest, protocols of self-assembling routes for bottom-up fabrication atop silicon platforms, representative current-voltage and memory readouts from molecular devices, and overviews of present architectural and mathematical approaches to programming molecular computing machines. The investment and commercial insertion landscape is painted along with a "Who's Who" in the molecular electronics business space. Advice and forewarnings are provided in a practical yet witty manner for the aspiring academic corporate founder and the business CEO wannabe seeking to establish a high tech company while wading through the idiosyncratic morass of university personalities and university-owned intellectual property.

## 书籍目录

Preface  
Chapter 1. Commercialization of Molecular Electronics 1.1 Introduction 1.2 Commercial Challenger of Molecular Electronics 1.2.1 Investments in Molecular Electronics 1.2.2 Molecular Electronics Market Insertion Strategy 1.3 Molecular Electronics-Focused Companies 1.4 Advice from the Trenches for the Wannabe Corporate Founder 1.5 From a Front Row Observer To the Aspiring CEO of an Academically Founded Startue  
Chapter 2. Molecular Electronics 2.1 Introduction 2.2 The DNA and Quantum Computing Distinctions 2.3 Present Microelectronics Technology 2.4 Monetary and Fundamental Physical Limitations OF Present Technology  
Chapter 3. Chemical Synthesis 3.1 Iterative Approaches to Oligo (2,5-thiophene ethynylene)s Molecular Wires, Properties and Experimental Details 3.1.1 Introeuction 3.1.2 Results and Discussion 3.1.2.1 Monomer Syntheses 3.1.2.2 Controlled Oligomer Syntheses 3.1.2.3 Oligomer Characterization 3.1.2.4 Attachment of Thiol End Groups 3.1.3 Summary 3.1.4 Experimental Procdeures  
3.2 Iterative Approaches to oligo(1,4-phenylene ethynylene)s Molecular Wires, Properties and Experimental Details 3.2.1 Introeuction 3.2.2 Results and Discussion 3.2.2.1 Monomer Syntheses for Solution-Based Oligomerizations .....  
Chapter 4. Molecular Self-Assembly, Device Construction, and Testing Chapter 5. Architectures in Molecular Electronics Chapter 6. Programming the Nanocell Bibliography Index
