<<当代房屋设计2HOUSES NOW>>

内容概要

What brings a home to life is the quest underlying the 22 spectacular houses in this volume. Hundreds of color photographs and floor plans show how the personality of each design is as important as its technical aspects. This collection takes us behind the facades into the minds of the architects in charge, leaving no facet unexplored. Undeniably contemporary, these projects were chosen for their ability to inspire, to break away from the norm. Every page of this book is thoroughly documented and profusely illustrated with full-color photographs, offering a wealth of information for architects, builders, or laypersons interested in new forms of domestic architecture.
