<<新元素室内设计Architecture >>

内容概要

Contemporary interior architecture with asoul. This is the best way to describe thework of Stephanie Laporte of The Office, whether the project is a private home or a commercial property. Clean, modern design with a great deal of respect for thebuilding's original character, spiced up with elements that reflect the personality of theowners - This unique result is unmistakably the work of The Office. Using beautiful materials and textures, light and colour, Stephanie Laporte transforms a room into a sophisticated and inviting interior. The results are clean and simple, but also have warmth and character. These are tasteful interiors with an atmosphere of calm and they often serve as a backdrop for contemporary art.
